Mechanisms of circadian time keeping and immune regulation

Dr, Yong ZHANG

Professor, Cam-SU Genomic Resource Center, Soochow University

The laboratory of Yong Zhang focused on biological rhythms and physiological homeostasis, using *Drosophila* as a primary model organism, to study the molecular and neural mechanisms of biological rhythms, as well as the regulation of circadian clock on sleep, immunity and other behaviors and physiology.

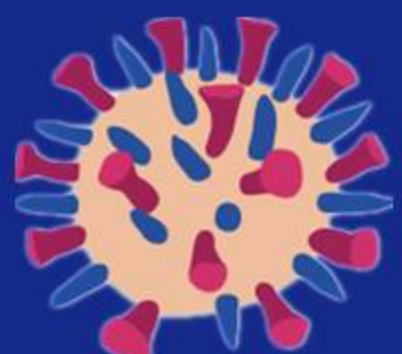

A201, Life Science Research Building

10:00 AM - 11:30 AM

April 21th, 2021

Host: Lei PAN

腾讯会议直播间 (Tencent Meeting teleconference room): 918 272 197
